WELCOME! WE ARE PROUD TO PRESENT 'VOCAL BYTES'

You have just received 1,071 of the freshest original vocal samples on CD in the universe. Sample all you want without worry because there are no rights reserved*. These samples were chosen out of 16 hours worth of vocal sessions recorded on DAT. The session DATs were dumped into Sound Tools™ and edited. We choose samples for their usefulness in dance music of all styles.

SAMPLING TIPS

Sample the vocals as hot (loud) as you can without distortion. Always listen to your new sample before sampling your next one. There are many ways to use your samples also. Don't forget to try delays, reverbs, chorusing, panning or anything to make your samples sing. If you find a rhythmic sample that is not at the correct pitch, first make the sample the correct tempo by tuning it. Then use a pitch shifter to make the sample the correct pitch for your song. Pitch shifters can be found in many of today's multi-effects units and even on some of the newer samplers. Have fun and be creative!

Produced by Erik Wikman and Mark Schaefer.
